

LIBERTY OPTHALMOLOGY

AMD – Age-Related Macular Degeneration

Age-related macular degeneration (AMD) is a common eye disease that causes deterioration of the macula, the central area of the retina, and the paper-thin tissue at the back of the eye where light-sensitive cells send visual signals to the brain.

Macular Health Formula®

EyeScience® Macular Health Formula® is the most complete eye vitamin supplement specifically for AMD. Based on more than two decades of ocular research, EyeScience® Macular Health Formula® contains 14 clinically proven nutrients to support a healthy retina, including omega-3, lutein, zeaxanthin, bilberry, grape seed extract, selenium, L-glutathione and alpha lipoic acid.

Dry Eye Syndrome

Dry eye syndrome (DES) is a common disorder of the tear film, affecting a significant percentage of the population, especially those older than 40 years of age. The estimated number of people affected ranges from 25-30 million in the United States. Worldwide, the [incidence](#) rate closely parallels that of the United States. DES can affect any race and is more common in women than in men.

Dry Eye Formula™

EyeScience® Dry Eye Formula™ is a unique oral supplement that may improve your dry eye symptoms for long lasting continuous relief. Although eye drops may provide temporary relief of your symptoms, they are inconvenient and cumbersome to use. Our formula works differently, from the inside out, addressing the underlying cause of dry-eye syndrome, not just the symptoms.

If interested in learning more about EyeScience®'s line of vitamin supplements for Macular Degeneration and Dry Eyes, please schedule a consultation to discuss how EyeScience® might be right for you.
